

NEW POSITION

Power Control Engineer

Location: Ireland

Duration: Permanent

Salary: Excellent Salary & Benefits

Position Details

Our client, a leader in ocean renewable technology, is looking for a Power Control Engineer for tidal development projects to be based in the East Coast of Ireland.

The successful candidate must have:

- A Degree in Electrical Engineering or a near equivalent.
- Minimum 2 years' electrical engineering experience.
- The ability to cooperate closely with Mechanical & Marine Engineers, as the machines are complex electro- mechanical devices operating in a harsh environment.
- Excellent analytical and electrical problem solving skills.
- Knowledge of engineering software tools such as Matlab, Labview, Python.
- Excellent interpersonal and communication skills.
- Works well within team and within a group of external engineering contractors.
- Ability to work to tight deadlines.
- Practical approach to work with an emphasis on simplicity of design and operation.
- Experience of DC power transmission and distribution.
- Experience of grid code and compliance.
- Must have a pre-existing work entitlement for the EU.

In return the successful candidate can expect an attractive salary package and benefits competitive to the market and the opportunity work in an international environment with a dynamic team.
