

Job Description

Position:	Wet Area Technician
Location:	NMCI, Ringaskiddy, Co. Cork
Role:	Technical Support.
Reporting to:	Operations Manager.

Description of the Position

Reporting to the Operations Manager, the successful candidate will be a member of the NMCI Services Commercial Team, and will provide technical support for a range of courses delivered at the National Maritime College of Ireland. This will include scheduled & bespoke course offerings in the areas of seamanship, small boat handling, sea survival and Fire Fighting.

Principal Tasks.

- To act in support of all training and related activities.
- To provide aid to the instructors on assigned classes as deemed appropriate by management in both lecture and practical sessions.
- To ensure that all courses are provided with the equipment and serviced facilities as laid down in the course programme and in line with course approvals.
- To liaise with Instructors to ensure that all related equipment, fixed & floating, is serviced, maintained and available as required.
- To maintain stocks of consumable class materials such as cordage, fuels, lubricants etc.
- Maintaining appropriate maintenance records and making available information as required by management and internal / external auditors.
- In the normal course of work, to ensure that safety standards for both staff and delegates are adhered to at all times.
- Participating in the implementation and maintenance of quality assurance.
- To comply with the procedures, staff notices and any other communications as issued by Management.
- To attend staff development training courses, both in-house and external, as determined by management
